

High Adventure Risk Management and Risk Assessment Statement

- High Adventure is committed to reducing and/or managing risks wherever practically possible. Policies and Operating Procedures will be written and updated when necessary to reflect risks identified in assessments.
- Risk assessments and policies will be reviewed and updated when needed by a person deemed to be "Competent" in the activity or area by the Management Team. Competence can be defined either through relevant qualifications or suitable experience.
- All ratios and qualifications quoted in risk assessments can be amended, on a case by case basis following discussion and agreement with the Management Team.
- Risk assessments will show the date of the last review or update. A log of which policies and risk assessments have been updated, when and by whom is kept in the staff handbook in the main office, available upon request.
